Product description

Cavel CABLEBOX DS250 – Reusable Coaxial Cable Dispenser

Dispense cable neatly, transport it easily and reuse the box again and again.

Installing long satellite and antenna cables can be frustrating when loose cable coils twist or become tangled. The Cavel CABLEBOX DS250 makes installation easier by keeping the cable inside a protective housing and allowing controlled dispensing.

Especially convenient: The Cavel DG113 A+ 250-metre cable reel (Ariasat item 5794) fits directly inside the CABLEBOX. Simply remove the empty internal reel and insert the DG113 cable reel. No need to transfer the cable to another reel!

Please note: This product includes the CABLEBOX DS250 without coaxial cable. The DG113 cable reel shown in the application photo is sold separately.

Key Benefits

• Controlled cable dispensing: Pull out the required cable length neatly.

• Reduced twisting: The dispensing mechanism helps prevent unwanted cable loops. …
