Product description

Cabelcon 90-FM-FF HQ – Premium 90° F Right-Angle Adapter

A small adapter with an exceptional difference in quality.

Not enough space behind your TV, satellite receiver or multiswitch? The premium Cabelcon 90-FM-FF HQ allows you to route your coaxial cable at a 90° angle without sharply bending it directly at the connector.

The real difference is inside: This premium adapter features a continuously bent beryllium-copper inner conductor

The conductor runs continuously through the 90° bend, eliminating an additional contact junction. This removes one potential cause of intermittent connections.
.

In some basic right-angle adapters, additional internal contact junctions can become weak points. The Cabelcon design avoids such a junction inside the bend, providing a particularly high-quality electrical connection.

Premium connection technology with exceptionally low signal loss – for satellite installations where quality matters. …
