Product description

Cabelcon FM-RG11-CX3 7.5 F Compression Connector RG-11/10.5mm

The Cabelcon FM-RG11-CX3 7.5 is a top-tier professional F compression connector, specifically engineered for multimedia and broadband applications on RG11 coaxial cables. It features the patented Cabelcon PushPin system: the integrated inner conductor pin snaps in audibly and tangibly as the cable is inserted. This guarantees an absolutely secure connection with the cable's inner conductor and ensures simple, error-free verification of proper installation.

Thanks to the high-quality Cabelcon EPDM seal in the union nut and the reliable sealing directly to the cable jacket, the connector is 100% waterproof after compression in accordance with IPX8 (tested for at least 8 hours at a water depth of 30 meters). This makes it excellently suited for demanding outdoor installations and direct burial applications.

Maximum protection against corrosion and environmental influences is provided by the proven NiTin-6 coating (nickel-tin). This also ensures outstanding shielding properties (Class A+), minimal transfer impedance, and excellent mechanical durability.

Technical Features & Highlights:

- PushPin System: Perfect signal contact for the in ...
