Product description

TV Aerial Cable for Cable TV – Kathrein LCD 111 A+ with Professional Cabelcon IEC Connectors

Aerial cables provide the foundation for stable signal transmission in satellite, cable TV and terrestrial antenna systems. To transmit the TV signal reliably from the aerial wall socket to your television or cable receiver, both a high-quality coaxial cable and carefully installed connectors are essential.

For this TV connection cable, we combine the high-quality Kathrein LCD 111 A+ coaxial cable with professional Cabelcon IEC connectors of industrial quality. At Ariasat, we assemble the cable in your selected length: a Cabelcon IEC male connector is fitted at one end and a Cabelcon IEC female connector at the other. Both connectors are professionally compression-fitted to the cable.

You receive a high-quality, durable and ready-to-use TV aerial cable, assembled for you in your selected length. There is no need to strip the cable or fit the connectors yourself.

Your benefits at a glance

• Made in your selected length: We assemble your connection cable according to the length you order.

• High-quality Kathrein cable: LCD 111 A+ with a so …
