Product description

Satellite Window Feedthrough 50 cm – Waterproof and Ultra Thin

Would you like to route the satellite cable from your satellite dish into your home without drilling through the wall or window frame? This extra-long satellite window feedthrough allows you to run your coaxial cable through a suitable window or door quickly and easily.

The flexible feedthrough section is only 0.3 mm thin and 12 mm wide. The 50 cm version provides additional flexibility during installation. Two F female sockets allow you to connect standard coaxial cables fitted with F male connectors. Protective rubber sleeves help prevent water from entering the F connections.

Key Benefits

• No drilling required: Route your satellite cable through a window or door without drilling into walls or frames.

• Extra-long design: Additional flexibility when routing cables through suitable window and door frames.

• Ultra thin: Flexible feedthrough section measuring only 0.3 mm in thickness and 12 mm in width.

• Water-protected connections: Rubber sleeves help …
