Product description

SATLINK WS-6916 HD Digital Satfinder

The SATLINK WS 6916 HD is a handy digital meter for signal verification and troubleshooting in DVB-S/S2 systems. The meter generates a visual and an audible signal when a satellite is found.
Signal strength and Signal quality are displayed as numerical values and as a bar graph.

As a further measured value, it determines the signal to noise ratio (C/N)
and the bit error rate (BER). In addition, the image quality can be checked
with the high-resolution 8.9cm TFT LCD screen.

To align the satellite antenna to the desired satellite
many satellites are pre-programmed.

Features:
- High-resolution 3.5 "TFT LCD screen
- Optical and acoustic signal at satellite reception
- Software update via USB stick
- Li-ion battery
- Operating time approx 4 hours (battery mode)
- Display of signal strength numerically and as bar graph
- Automatic calculation of the angle of azimuth and elevation
- Display of polarization …
